VIDEO SURVEILLANCE

Securing areas furthest from any electricity with Honeywell and LEKLA combined solutions is now possible. As a partner of Honeywell, solar energy station manufacturer LEKLA developed the PIVO solution, a patented solution entirely manufactured in Canada, compatible with Honeywell video surveillance solutions such as the IP Performance range of cameras.

BENEFIT FROM THE QUALITY OF THE PICTURES OF HONEYWELL IP CAMERAS TO SECURE LARGE SPACE

Honeywell partners with LEKLA to provide security solutions that go even further. With its Performance range, including 2MP/4MP micro domes and 2MP PTZ WDR 2MP IP dome, Honeywell offers reliable solutions to secure harsh environments such as large national parks. In response to the constraints of the lack of electricity in this type of environment, the combination of Honeywell solutions with LEKLA becomes the ideal solution.

NATIONAL PARKS AND PUBLIC SAFETY

Lekla PIVO solution enables the production and storage of energy up to 7500W of storage. This self-supporting structure is designed to withstand all types of environments and large temperature variations, theft and vandalism. Providing the electricity needed to power Honeywell cameras, this ingenious solution provides a "GREEN" and autonomous power source when costly excavation work is required to bring the power grid in. This innovation allows a return on investment right from the installation stage. Other applications such as public safety, lighting with signaling options, are also possible with Lekla and Honeywell technologies.

	ORDERING	
	H2W2PER3	IP Micro-dome IR 2,8 mm WDR 2 MP, H.265/H.264, PoE, IP66
	H2W4PER3	IP Micro-dome IR 2,8 mm WDR 4 MP, H.265/H.264, PoE, IP66
	H4W2PER3	Robust infrared mini-dome WDR 1080p
	HDZP252DI	IP PTZ Dome, True Day/Night, 1080p resolution, x25 zoom, WDR, H.265/H.264, NTSC/PAL, 6 IR LEDs, IP66, PoE+, micro SD card support (up to 128 GB, card not included)
